## 6.2 Методические указания по организации самостоятельной работы

## **студентов**

Лекции, прослушанные студентами, дают систематизированные основы научных знаний и являются первым этапом теоретической подготовки. Они могут проводиться как в классической форме, так и с применением инновационных, интерактивных методов.

Фактические занятия проводятся в форме семинаров. Целью их проведения является углубленное рассмотрение и закрепление материала, полученного на лекциях и в процессе самостоятельной работы над учебной и научной литературой. Семинары посвящаются обсуждению важнейших тем в форме опроса, групповой дискуссии, рассмотрения конкретных ситуаций. На них же осуществляется текущий контроль знаний. При проведении семинаров преподаватель должен ориентировать студентов на самостоятельную работу. Одной из ее форм могут стать небольшие доклады по той или иной обсуждаемой проблеме.

Самостоятельная работа – совокупность всей самостоятельной деятельности обучающихся как в отсутствие преподавателя, так и в контакте с ним. В ходе самостоятельной работы студент учится использовать учебную и научную литературу. При работе с методическими указаниями, учебной и научной литературой студенту следует обращать первостепенное внимание на то основное, что должно быть вычленено в каждом вопросе. В ходе самостоятельной работы целесообразно законспектировать рекомендуемую литературу, осмыслить фактический материал и сделать выводы. Если в ходе изучения темы возникнут какие-либо трудности, которые сам студент не может преодолеть, ему необходимо обратиться к ведущему курс преподавателю.

Для контроля знаний используются тестовые материалы и вопросы для устной проверки самостоятельной подготовки, а также вопросы для подготовки к промежуточной аттестации.
